

QUICK COMPARISON OVERVIEW FOR TIME & ATTENDANCE SYSTEMS PC- LINKED – TRADITIONAL CLOCKS

ActIn Time 2010

These are our flagship products, which are SQL 2000 server based Time Attendance Management Systems complete with Personnel, Time & Attendance, Flexitime, Absence tracking, Internet module for booking absences/attendance, Access Control, Fire Roll Call, VB Scripting, Diary Agenda Prompting, Report Designer, and many more exciting features.

Simply define each of your daily/weekly work patterns and the easy-to-use software will calculate the most complex of overtime rules. Replace laborious, manual, 'pen-and-paper' calculations with this automated, 'total-hours worked' solution to improve efficiency and reduce human error. Implementing ActIn Time will save you time and money.

Computerised, Stand-Alone & Basic Time Attendance Recording, Job Costing & Access Control Systems, Payroll, Time & Date Stamps

Timestart & Timestart Junior

This product was specifically designed for the smaller company looking for a cheap and simple time attendance system that connects to a PC that would also produce reports on Time & Attendance, lateness, core-time, roll call (to see who's IN/OUT), etc.

It is a very easy to use system that is even more simplified if you purchase our "Bonus Package" where the system is pre-programmed with your employee names and shift patterns to enable you to have a working system from the box.

This sometimes works out a lot cheaper than some traditional "Clock Card Systems" but has the advantage of automatic calculations and reports, it also can operate a simple door access system.

timestart – 150 employees, 10 shifts, 10 departments, 4 rates of overtime etc.

timestart Junior – same as above but limited to 15 employees.
